Course Description

Multilingual learners bring a richness of experience and diversity to our classrooms, but they also have unique support needs. In this course, you will delve into the intricacies of Culturally Responsive Teaching (CRT), Culturally and Linguistically Responsive Teaching (CLRT) and UDL, learning how to provide multiple pathways for engagement, representation, and expression to meet the varied language proficiencies of your students. You will explore practical strategies for integrating linguistically responsive practices into your teaching, ensuring that every learner, regardless of language background, can access and succeed in the curriculum.

Whether you have a strong background in UDL or are unsure of where exactly you are in your implementation of UDL, this course meets you where you are and is your gateway to mastering Universal Design for Learning (UDL) and linguistically responsive practices, tailored specifically to meet the diverse needs of multilingual learners. Discover how to unlock the full potential of your students by embracing their linguistic and cultural backgrounds as assets, not obstacles. Through a dynamic blend of theory, hands-on activities, and real-world examples, you will gain the tools and confidence to create truly inclusive learning environments where all students feel valued, supported, and empowered to reach their full potential.

Course Objectives

- Develop a comprehensive understanding of Universal Design for Learning (UDL) principles and their application in supporting multilingual learners.

- Explore the unique support needs of multilingual learners in the context of the Culturally and Linguistically Responsive (CRLT) framework and gain practical strategies for integrating linguistically responsive practices into instructional planning and delivery, fostering a culturally inclusive classroom environment where language diversity is celebrated and leveraged for learning.
- Acquire the skills to design and implement inclusive learning experiences that address the linguistic and cultural assets of multilingual learners, enabling them to access and demonstrate their understanding of academic content while promoting equity and maximizing learning outcomes for all students.

Course Requirements

This course requires participants to be engaged and prepared for each and every assignment. The course will be offered online yet students will have the opportunity to communicate with fellow participants through Canvas discussion boards. Participants will be expected to pass in work by the due date, but will also be given the opportunity to revise and improve upon their work (just as students in their class should be given the same respect using the UDL framework). Extensions will be granted if you contact the instructor before the due date. All work should be your own - when you reference other's work or research, make sure to cite the work.

Course Schedule

To be announced. There will be four live sessions. Each session and recordings will be shared within the course within 24 hours of each session. It is recommended to attend live, but not required.
